Project topic:

Assessment

Calibration Note: EECE has adopted the following points of reference in its project assessment discourse. Indicated values are modal/nominal. Assessment may vary about these calibration points.

Descriptor	Below average	Acceptable	Good	Very good
Modal value %	0~49	50~64	65~74	75~100

1. GA 1: Problem solving

1.1 **Criteria 1: (20%)** A complex CE/EC/EL problem is defined.

Comment:	Progress made	Mark 0~100
Enter a comment	Acceptable	55

1.2 **Criteria 2:** Analysing the complex CE/EC/EL problem

1.2.1 **(20%)** Literature survey or review is performed.

Comment:	Progress made	Mark 0~100
Enter a comment	Acceptable	50

1.2.2 **(20%)** Criteria for an acceptable solution are identified after literature review.

Comment:	Progress made	Mark 0~100
Enter a comment	Acceptable	55

1.2.3 (20%) Feasibility study for the acceptable solution is performed for the complex engineering problem.

Comment:	Progress made	Mark 0~100
Enter a comment	Acceptable	60

1.3 **Criterion 3: (20%)** Formulating complex engineering problem using one or more of the following
- block diagrams, flowcharts, mathematical expressions, and any other acceptable formulation.

Comment:	Progress made	Mark 0~100
Enter a comment	Good	65

2. GA 2: Application of Scientific and engineering knowledge – Criteria 1-4

2.1 (25%) Applying theoretical principles of natural sciences to solve the complex engineering problems.

Comment:	Progress made	Mark 0~100
Enter a comment	Good	70

2.2 (25%) Applying mathematics, or numerical analysis, or statistics to analyse and model the complex engineering problems.

Comment:	Progress made	Mark 0~100
Enter a comment	Very Good	75

2.3 (25%) Successfully use systematic and theory-based engineering solution formulation, which is based on engineering fundamentals.

Comment:	Progress made	Mark 0~100
Enter a comment	Very Good	80

2.4 (25%) Successfully use at least one specialist knowledge area in solving complex engineering problems.

Comment:	Progress made	Mark 0~100
Enter a comment	Good	67

3. GA 3: Engineering design – Criteria 1 and 2

3.1 (50%) Performing procedural and/or non-procedural design, for example using system design flowchart, or top-down design process or problem-solving methodology.

Comment:	Progress made	Mark 0~100
Enter a comment	Very Good	78

3.2 (50%) Performing procedural and/or non-procedural design synthesis.

Comment:	Progress made	Mark 0~100
Enter a comment	Bad	23

4. GA 6: Professional Technical Communications

4.1 (20%) Has the student demonstrated competence in the oral presentation?

Comment:	Progress made	Mark 0~100
Enter a comment	Bad	34

4.2 (60%) Has the student demonstrated competence in the report writing?

Comment:	Progress made	Mark 0~100
Enter a comment	Very Good	89

4.3 (20%) Is the student aware of ethics in technical reporting/presenting?

Comment:	Progress made	Mark 0~100
Enter a comment	Very Good	87

Phase 2 Marking	
1. [20%] GA1: Problem solving.	11,4
2. [30%] GA2: Application of Scientific and engineering knowledge.	21,9
3. [30%] GA3: Engineering Design.	15,15
1.1 [20%] GA6: Professional and technical communication	15,52
Phase 2 Mark (%) <i>Refer to the indicated weightings</i>	63,97

Name: _____ Signed: _____ Date: 2022/09/01
 (Supervisor/Internal examiner)
